## **The Third International Conference on Global Civilization Problems** on **Civilization in the Grip of Collective Repression**

The query: "What is the Most Serious Problem for Civilization?" may clearly be answered by: it is the "Irrational Behaviour of the Collective [IBC] as expressed in Holocaust, War, Terrorism, & Destructive Technology", inevitably followed by:

Can a Collective, or even mankind as a whole, behave like an individual neurotic?  
Can the Collective, therefore, compulsively repeat the defensive aggression built up against a heavy trauma experienced in the past & later repressed, when this collective is facing a crisis in the present, a crisis which today is not rationally analysed but subconsciously identified with the repressed excitation background?  
If the answer is **YES**, the processes of civilization could only be freed from IBC by releasing the traumatic excitation background from the shackles of repression.

To continue (exactly as in the case of a neurotic individual), these questions call for an analysis (1) of human & natural history, & (2) of observed nature, resolving whether collectively universal teaching agrees with (a) logical & (b) matter-of-fact evidence.

**Result:** It is so absurdly easy to point out facts proving the repression of traumatic global catastrophic experiences that the immense exertions & expense invested by the collective in the attempts to escape the awareness of the truth are hardly credible:  
& yet, any individual is quite able to observe how the entire wisdom system of the collective (the PRS-conglomerate including the Philosophies, the Religions, & the [exo- & esoteric] Sciences) are installed as a machinery with the single purpose of repressing logical & observed facts into hotchpotching theories.

☞ It must not be ignored that the detection of the PRS-conglomerates generally irrational performance also includes "civilization problems" anticipated by corrupt theories such as about HIV/AIDS, or "man-made" global environment "dangers", even down to population "explosion" supposedly overtaxing achievable food production.

**The 3 straightforward key proofs for hotchpotched physics & history are:**

- The Joshua Event : **proving that planets can encounter each other**  
The 2 Calendar Reforms CCR & GCR : **proving that earth movements in historical time were influenced by other celestial bodies**  
& additionally the dinosaur extinction : **proving that gravitation is variable** (because today the animals would simply be too heavy to move)

RHNH = Reconstruction of Human & Natural History; cf (generally in German) [www.paf.li/fagplus.htm](http://www.paf.li/fagplus.htm).

PRS(-conglomerate) = entirety of the collective wisdom systems, ie the Philosophies, Religions & [exo- & esoteric] Sciences; with its working CREDO ""What is OBSERVED is NOT to be PERCEIVED, & what is to be BELIEVED is NOT to be OBSERVED"

LGJ = Last Great Jolt (the last one ending a series of catastrophes in the middle of the Trecento, caused by a repositioning of the earth); cf (generally in German) [www.paf.li/lgr.htm](http://www.paf.li/lgr.htm).

EVU = Electric Vortex Universe; cf (generally in German) [www.paf.li/erkenntnisse.htm](http://www.paf.li/erkenntnisse.htm).

GCR = Gregorian, CCR = Canopus Calendar Reform.

CoR = Collective Repression; IBC = Irrational Behaviour of the Collective.
