

① Traditional Scheme

② Chronology Revised According to Synchronisms

NOTE 1 The chronological distance from the time of the Ptolemies to the LGR in the middle of the Trecento ("1"4th AD century) cannot be calculated. It is composed, however, of the great civilizations which (on the background of the Mars Events) rose in the fertile & now metallurgically enriched belts of the earth, advancing to the very beginnings of global colonization, & then brought down by the "apocalyptic" Venus-Mercury Events of SchizoTime.

NOTE 2 Mainly due to the utterly absurd Egyptological Sothis/Manetho chronology & the corrupting of its sources the RHNH has not been able to establish an unambiguous pre-Exodus historiography of civilization. Its traces must be chronologically positioned between the known sequence of natural catastrophes (Saturn>Venus>Mars>Venus/Mercury).
