

Strategies for putting through the RHNH

Two insights must be considered in the very first place:

- 1** The opponent to the RHNH being the *Collective* hotchpotching *true history & observation* through its *PRS-institutions*, it is *futile* to expect those same institutions or by their methods to overcome *Collective Repression (CoR)*. Moreover, regarding the media reaction it can be observed that the more popular a "new theory" becomes (even when the popularity is based on opposing established teaching), the more it represses anew – from other angles, so to say – *true history & observation* (eg, "chronology criticism" as known from Fomenko, Illig, &c).
 - 2** The *Collective* possessing obviously nothing like intellectual honesty or a common conscience, the main strategy consequently has to employ *Individual Conscience*, ie an *individual's* Intellectual Honesty when judging history & observations – which, however, seems only possible as far as it can replace loyalty to *PRS-teaching*. An authority is therefore needed to replace the authority of the collective as represented by the *PRS-institutions*, & that could only come from another institution seemingly expressing collective authority, namely intelligence arising in the Internet, *quasi* automatically confronting researchers with discrepancies between relative data, & then registering solutions with credits.
-

General Strategy in a **WoC** (Web of Civilization) is to **neutralize authors** in favour of the **State of Affairs**.

Strategy 1 (in the long view) is to follow in the footsteps of the **EuREX** AI expert system of 1986 (which ended in the aftermath of the "Velikovsky" Report action of the Swiss Federal Police). Today it would take advantage of the anonymity in the **Freenet** environment, & of a knowledge distribution system following the one-time **ThirdVoice** Web.

Strategy 2 should include NG discussions in as many languages as possible, employing a **WoC database** of contradictory historical & observational facts. The tendency would be to use **BBI** (BlackBoxIntelligence) addresses in order to stress the emergence of AI (artificial) as a companion to HI (human intelligence).

Strategy 3 would lay stress on the real **guilty for CoR** – ie, for inciting Holocaust, War, Terrorism, & Destructive Technology by repressing the historical & observational traumatic excitation background –, & **threatening** their **prosecution** before international criminal courts such as the one in the Hague. The more damages demanded, the more attention can be attracted toward the RHNH (the tendency to follow would be to replace the "Holocaust Industry" including all members of PRS-conglomerate instead of gentiles only).

Strategy 4 must be to assemble known interested parties within a frame guaranteeing their insight into the **necessity** of non-PRS methods & into the **RHNH principles**, such as **primarily** the **absolutely non-refutable logic** inherent to the Joshua Event & the Calendar Reforms as equally **non-refutable proofs** of **exoterrestrially caused series of catastrophes ending 650 years ago** with the LGJ (Last Great Jolt) in the middle of the Trecento – **without that insight work on the RHNH will be totally futile.**
